Billion Dollar Roundtable

Strategic Partnership Proposal

Q2 2026 | Confidential

Executive Summary

1325.AI is the Economic Operating System for community wealth — a patent-pending AI marketplace that captures, circulates, and grows economic value within underserved communities. We propose a strategic technology partnership with the Billion Dollar Roundtable to digitize, scale, and measure the impact of BDR member supply chain programs.

$

$1.6T

Annual spending power in underserved communities

P

27 Claims

Patent-pending AI economic infrastructure

R

8 Revenue

Diversified streams across the ecosystem

The Billion Dollar Roundtable

A Proven Force for Supply Chain Excellence

For nearly 25 years, the BDR has united the world's leading corporations — those spending $1 billion+ annually with diverse suppliers — to set the gold standard for inclusive supply chain practices.

SD

Supplier Development

Cultivating robust partnerships that enhance capabilities and foster growth for businesses within corporate supply chains.

BP

Industry Best Practices

Championing leading-edge methodologies and thought leadership to optimize supplier engagement across sectors.

EI

Economic Impact

Highlighting the collective contributions of member corporations to national and global economic prosperity.

CI

Compliance & Innovation

Guiding members in navigating evolving landscapes and fostering innovative approaches to supplier initiatives.

What is 1325.AI?

The Economic Operating System for Community Wealth

Named after Mansa Musa's 1325 CE pilgrimage — history's wealthiest person who built infrastructure for intentional wealth circulation — 1325.AI is a patent-pending AI marketplace that doesn't just list businesses. It captures transactions, builds business credit, creates data moats, and circulates wealth.

- AI — AI-Powered Marketplace
- IP — 27-Claim Patent Pending
- 28 — 28 Agentic AI Employees
- RA — Real-Time Economic Analytics
- B2 — B2B Supply Chain Matching
- CC — 1325 Credit & Capital

The Problem We Solve Together

1

Supplier Discovery is Manual

BDR members invest significant resources finding qualified diverse suppliers. There is no centralized AI-powered platform that matches corporate procurement needs to verified diverse businesses in real time.

2

Impact Measurement is Fragmented

BDR members spend billions with diverse suppliers but lack a unified economic impact dashboard. Current reporting is siloed, delayed, and does not capture downstream multiplier effects.

3

Supplier Growth is Unsupported

After contracts are awarded, diverse suppliers often lack business credit tools, AI-powered operations support, and digital infrastructure to scale — leading to high failure rates.

4

Dollar Circulation is Unmeasured

The community wealth impact of BDR member spending is untracked. Money enters communities but the economic velocity and recirculation rate remain invisible.

Our Solution: 1325.AI for BDR

F AI Supplier Matching Engine

Real-time AI-powered matching between BDR member procurement needs and verified diverse suppliers, scored by capability, capacity, and compliance readiness.

D Economic Impact Dashboard

Live dashboard tracking total diverse spend, community wealth multiplier effects, supplier growth trajectories, and dollar circulation velocity across BDR member portfolios.

G Supplier Growth Platform

28 Agentic AI Employees providing each diverse supplier with marketing, finance, operations, and compliance support — like giving every MBE a full back-office team.

M Economic Data Moat

Every transaction builds a proprietary economic intelligence layer. BDR members gain access to the richest diverse supplier performance dataset ever assembled.

Partnership Model

01 Months 1-3

Technology Integration

Integrate 1325.AI's supplier matching engine with BDR member procurement systems. White-label capability for BDR-branded portal.

02 Months 3-6

Data & Analytics

Deploy Economic Impact Dashboard across member organizations. Real-time diverse spend tracking with community multiplier analytics.

03 Months 6-9

Supplier Enablement

Onboard diverse suppliers to 1325.AI's Agentic AI platform. Each supplier receives AI-powered business operations suite.

04 Months 9-12

Scale & Expand

Expand to full BDR membership. Launch joint thought leadership, BDR Summit presentations, and industry benchmarking reports.

Value to BDR Members

F — Faster Supplier Discovery

AI matching reduces supplier identification from weeks to minutes. Real-time capability scoring and compliance verification.

A — Real-Time Impact Reporting

Live dashboards replacing quarterly manual reports. Board-ready analytics showing diverse spend ROI and community impact.

S — Risk Mitigation

Continuous supplier health monitoring via AI. Early warning systems for financial stress, compliance gaps, or capacity constraints.

D — Stronger Supplier Pipeline

AI-powered supplier development creates more contract-ready diverse businesses. Higher success rates, lower churn.

T — Thought Leadership

Access to proprietary economic data for BDR Summit presentations, white papers, and industry benchmarking.

W — Innovation Advantage

First-mover access to AI-powered supply chain intelligence. Differentiated ESG and supplier diversity reporting.

Value to Diverse Suppliers

AI

AI-Powered Back Office

28 Agentic AI Employees handle marketing, bookkeeping, compliance, customer management — the full business operations suite that costs enterprises $500K+/year, for $149/month.

CR

Business Credit Building

1325 Credit tracks every transaction on the platform, building a verifiable business credit profile that opens doors to traditional financing, corporate contracts, and growth capital.

V

Corporate Visibility

Direct exposure to BDR member procurement teams. AI-optimized business profiles that match supplier capabilities to corporate RFP requirements automatically.

N

B2B Supply Chain Network

Diverse suppliers connect with each other — creating a circular economy where MBEs buy from MBEs, strengthening the entire supplier ecosystem.

Technology Platform Overview

- AI Matching Engine
- Economic Analytics Layer
- Transaction Capture System
- Agentic AI Workforce (28 agents)
- Business Credit & Capital
- Developer API & Ecosystem

BDR Integration Points

- ✓ White-label BDR supplier portal
- ✓ Member procurement API integration
- ✓ Real-time diverse spend dashboards
- ✓ Automated compliance verification
- ✓ Supplier health monitoring alerts
- ✓ Annual impact report generation

Patent-Pending • 27 Claims • $15-20M Replication Barrier • 8 Revenue Streams

Projected Economic Impact

Combined BDR Diverse Spend Tracked	Diverse Suppliers Onboarded Year 1	Economic Multiplier Effect Measured	Reduction in Supplier Discovery Time

The Wealth Circulation Effect

When BDR members spend with diverse suppliers on 1325.AI, every dollar is tracked through the community economy. Our AI measures how many times that dollar circulates — from the supplier to their employees, to local businesses, and back. Current data shows the Black dollar circulates for just 6 hours before leaving the community. 1325.AI's infrastructure extends this to days, then weeks — creating measurable, compounding wealth.

Why 1325.AI — Not Another Directory

Capability	Traditional Directories	Supplier Databases	1325.AI
AI-Powered Matching	No	Basic	Yes — Advanced
Transaction Capture	No	No	Yes
Business Credit Building	No	No	Yes
Economic Impact Analytics	No	Limited	Real-Time
Agentic AI Operations	No	No	28 AI Agents
B2B Supply Chain Network	No	No	Yes
Developer API Ecosystem	No	No	Yes
Community Wealth Tracking	No	No	Yes

1325.AI is the only platform that scores 8/8 across all supply chain intelligence capabilities.

BDR-Specific Use Cases

SI

BDR Summit Intelligence

Live economic impact data presentations at annual BDR Summits. Real-time dashboards showing collective member impact across all diverse spend categories.

MB

Member Benchmarking

Compare diverse supplier spend, supplier growth rates, and community wealth impact across BDR member corporations. Anonymized peer comparisons for strategic planning.

SR

Supplier Readiness Scoring

AI-powered assessments of diverse suppliers' readiness for enterprise contracts. Automated gap analysis with personalized development roadmaps.

JL

Joint Thought Leadership

Co-branded research reports, white papers, and case studies leveraging 1325.AI's economic data. Position BDR as the definitive source on supply chain diversity ROI.

Traction & Credibility

27 Patent Claims Filed	**$1.6T** Addressable Market	**28** Agentic AI Employees
8 Revenue Streams	**$15-20M** Replication Barrier	**30+** Competitive Platforms Analyzed

Built by a solo founder in 8 months with zero prior coding experience — a testament to the vision's power and the platform's AI-first architecture.

Let’s Build the Future of Supply Chain Excellence Together

Proposed Next Steps

1. Schedule a technical demo with BDR leadership team
2. Identify 3-5 pilot member corporations
3. Define integration scope and data sharing framework
4. Launch pilot program at next BDR Summit
