Complete Platform Valuation Report

COMPREHENSIVE ENTERPRISE VALUATION ANALYSIS

Prepared for Qualified Investors & Strategic Partners

Thomas D. Bowling · Inventor & Chief Architect

CONFIDENTIAL · Q2 2026 · FOR AUTHORIZED RECIPIENTS ONLY
USPTO Provisional Patent 63/969,202 · 27 Claims Filed

SECTION 01

Executive Summary

1325.AI represents a category-defining platform operating at the intersection of four previously unconnected verticals: Vertical SaaS, Agentic AI, Community-Specific Infrastructure, and Full Economic Operating System. No comparable platform exists in the market today, creating a first-mover advantage with significant defensible moats.

This valuation report employs five independent methodologies to establish a comprehensive enterprise value range. Each methodology reinforces the thesis that 1325.AI's integrated approach to serving the African Diaspora business community — spanning 6 countries and a $4.2 trillion economic corridor — positions the platform for exponential growth.

$910M	$1.82B	$2.84B	$135–540M
BEAR CASE Conservative	BASE CASE Most Likely	BULL CASE Optimistic	IP PORTFOLIO Patent Value

Key Valuation Drivers:

- Patent-protected technology stack with 27 claims covering autonomous agentic AI operations
- 294+ production database tables and 110+ Supabase Edge Functions representing 18+ months of development
- Proprietary CMAL (Community Money Acceleration Loop) engine driving network effects
- TAM of $127B across SaaS, fintech, and marketplace verticals for underserved communities
- Tiered subscription model ($19–$599/mo) with 86% blended gross margins at scale
- Six-country diaspora coverage creating cross-border economic infrastructure

SECTION 02

Total Addressable Market

The 1325.AI platform addresses a massive, fragmented market across multiple verticals. The African Diaspora business ecosystem encompasses 6 countries (US, UK, Canada, Nigeria, Ghana, South Africa) with a combined economic output exceeding $4.2 trillion. Black-owned businesses in the US alone represent 3.12 million enterprises generating $206 billion in annual revenue.

Market Sizing Framework

Market Vertical	TAM	SAM	SOM
Vertical SaaS for SMBs	$65.1B	$18.2B	$1.82B
Fintech & Lending Infrastructure	$31.4B	$8.8B	$880M
B2B Marketplace & Supply Chain	$18.7B	$5.2B	$520M
Community Platform & Network	$12.3B	$3.4B	$340M
Total Combined	$127.5B	$35.6B	$3.56B

Diaspora Economic Corridor — 6-Country Coverage

Country	Black-Owned Biz	Annual Revenue	Status
United States	3.12M	$206B	Primary
United Kingdom	420K	$18.2B	Active
Canada	185K	$11.4B	Active
Nigeria	41.5M	$89B	Expansion
Ghana	2.8M	$12.1B	Expansion
South Africa	3.6M	$24.7B	Expansion

The platform’s multi-country architecture creates powerful network effects: a supplier in Lagos connects with a buyer in Atlanta, facilitated by 1325.AI’s autonomous matching engine. This cross-border capability is unmatched by any horizontal SaaS competitor.

SECTION 03

Methodology 1: Revenue Multiples

Revenue multiple analysis benchmarks 1325.AI against comparable public and private SaaS companies. Given the platform's vertical focus, agentic AI capabilities, and community-specific moats, we apply premium multiples reflecting the platform's unique positioning.

Comparable Company Analysis

Company	Revenue	EV/Rev	Category
Shopify (SHOP)	$7.1B	14.2x	Vertical Commerce
HubSpot (HUBS)	$2.6B	12.8x	SMB SaaS Suite
Toast (TOST)	$4.1B	8.5x	Vertical SaaS
Faire (Private)	$800M	15.0x	B2B Marketplace
Gusto (Private)	$600M	13.3x	SMB HR/Payroll
1325.AI (Projected)	$142M*	15–20x	Economic OS

*Year 5 projected ARR at scale

Multiple Justification

- **Category creation premium (2–4x uplift):** No direct competitor exists in the Vertical + Agentic + Community + OS intersection
- **Network effects premium (1.5–2x):** CMAL engine creates viral growth loops; each new business increases value for all participants
- **IP premium (1.3–1.5x):** 27-claim patent portfolio covering autonomous business operations provides 20-year defensibility
- **Gross margin premium:** 86% blended margins exceed SaaS median of 72%, supporting higher multiples

$924M	$1.56B	$2.84B
CONSERVATIVE (12X)	BASE CASE (15X)	BULL CASE (20X)
Year 3 · $77M ARR	Year 4 · $104M ARR	Year 5 · $142M ARR

SECTION 04

Methodology 2: Discounted Cash Flow

A 10-year DCF model captures the long-term value creation potential of 1325.AI's platform economics. Key assumptions include aggressive but achievable customer acquisition trajectories, expansion revenue from cross-sell/upsell within the integrated OS, and margin improvement as autonomous AI agents reduce operational costs.

DCF Model Assumptions

Parameter	Value	Rationale
Discount Rate (WACC)	18%	Early-stage risk premium
Terminal Growth Rate	4%	Above GDP for category leader
Revenue CAGR (Yr 1–5)	142%	Land-and-expand model
Revenue CAGR (Yr 6–10)	28%	Mature growth phase
EBITDA Margin (Terminal)	61%	AI-driven cost efficiency
Customer Churn Rate	3.5%	High switching costs
Net Revenue Retention	142%	Expansion revenue

Projected Free Cash Flow ($M)

Metric	Year 1	Year 2	Year 3	Year 4	Year 5
Revenue	$3.8	$14.2	$38.5	$83.2	$142.0
Gross Profit	$3.0	$11.6	$32.3	$70.7	$122.1
EBITDA	($1.8)	$2.8	$13.9	$39.0	$86.6
Free Cash Flow	($4.2)	($0.6)	$8.1	$29.1	$69.5

$480M	$1.56B	$2.04B
PV OF CASH FLOWS	TERMINAL VALUE PV	TOTAL DCF VALUE
Years 1–10	Beyond Year 10	Base Case

SECTION 05

Methodology 3: Comparable Transactions

Analysis of recent M&A transactions and growth-stage funding rounds for comparable vertical SaaS, community platforms, and AI-native companies provides market-validated benchmarks for 1325.AI's enterprise value.

Recent Comparable Transactions

Transaction	Valuation	Multiple	Category
Mailchimp → Intuit	$12.0B	~20x Rev	SMB Marketing OS
Figma → Adobe*	$20.0B	~50x Rev	Design Platform
Sendbird (Series C)	$1.05B	~35x Rev	Community Infra
Calendly (Series B)	$3.0B	~30x Rev	Vertical SaaS
Faire (Series G)	$12.4B	~15x Rev	B2B Marketplace
Gusto (Series E)	$9.6B	~16x Rev	SMB Payroll/HR

*Deal terminated due to regulatory concerns; valuation reflects agreed terms

Transaction Multiple Analysis for 1325.AI

Applying the median transaction multiple of 20x to 1325.AI's projected Year 3–5 revenue yields a valuation range consistent with the other methodologies. The platform's unique category-creation position justifies multiples at or above the 75th percentile of comparable transactions.

Scenario	Implied Value	Assessment
Year 3 ARR ($38.5M) × 15x	$578M	Conservative
Year 3 ARR ($38.5M) × 25x	$963M	Category Premium
Year 4 ARR ($83.2M) × 20x	$1.66B	Base Case
Year 5 ARR ($142M) × 20x	$2.84B	Bull Case

SECTION 06

Methodology 4: Intellectual Property Valuation

The 1325.AI patent portfolio (USPTO Provisional 63/969,202) encompasses 27 claims covering the autonomous operation of business services through agentic AI. This IP creates a 20-year defensibility moat that significantly enhances enterprise value independent of revenue projections.

Patent Claims Coverage

Claims	Coverage Area	Classification
Claims 1–8	Autonomous AI Agent Orchestration	Core
Claims 9–14	Self-Healing Infrastructure Mgmt	Core
Claims 15–19	Community Economic Loop Engine	Novel
Claims 20–23	Cross-Border Diaspora Matching	Novel
Claims 24–27	Voice AI Business Operations (WebRTC)	Emerging

IP Valuation Approaches

Method	Valuation Range	Basis
Cost-to-Recreate	$45–67M	18 months dev, 294+ tables, 110+ functions
Income Attribution (10yr)	$135–270M	15–20% of projected revenue attributed to IP
Market Comparable	$180–540M	Benchmarked vs. AI/SaaS patent portfolios
Licensing Potential	$25–50M/yr	Defensive licensing revenue stream

Technical Infrastructure — Defensibility Metrics

- 294+ database tables across 23 autonomous service domains — represents 18+ months of specialized development
- 110+ Supabase Edge Functions providing serverless business logic with sub-100ms response times
- 23 autonomous AI agent services handling invoicing, compliance, lending readiness, grant matching, and more
- WebRTC Voice AI interface enabling natural language business operations — unique in the vertical SaaS space
- Self-healing infrastructure that monitors, diagnoses, and resolves system issues without human intervention

SECTION 07

Methodology 5: Sum-of-Parts Analysis

A sum-of-parts approach values each major business line independently, reflecting the platform's diversified revenue streams and the optionality inherent in its multi-vertical architecture.

Business Line	Revenue Model	Valuation Range	Basis
Core SaaS Platform	$19–$599/mo tiered	$520–720M	12–15x ARR
B2B Marketplace	Transaction fees + matching	$160–280M	Marketplace comps
Fintech / Lending	Origination + credit services	$120–250M	Fintech multiples
Directory & Discovery	17K/day auto-discovery	$80–160M	Data asset value
AI Agent Services	Per-action + autonomous ops	$130–340M	AI-native premium
IP Portfolio	27-claim patent	$135–540M	Cost + income method
Community Network	6-country diaspora graph	$60–160M	Network effects value
Total Sum-of-Parts		$1.21B – $2.45B	

Cross-Segment Synergies

The sum-of-parts analysis understates total value because it does not fully capture cross-segment synergies. A business that subscribes to the SaaS platform also generates marketplace transactions, uses lending tools, and contributes to the community network. These interconnections create a synergy premium of 15–25% on top of the sum-of-parts value.

$1.39B	$2.14B	$3.06B
15% PREMIUM	20% PREMIUM	25% PREMIUM

SECTION 08

5-Year Financial Projections

The following projections model 1325.AI's path from early-stage revenue to a $142M+ ARR platform. Assumptions are grounded in comparable SaaS growth trajectories with adjustments for the platform's unique market dynamics and tiered pricing model ($19–$599/mo).

Revenue & Profitability Model ($M)

Metric	Year 1	Year 2	Year 3	Year 4	Year 5
Subscribers	200	780	2,050	4,400	8,800
Blended ARPU (Monthly)	$158	$152	$157	$158	$134
MRR	$0.32	$1.19	$3.21	$6.93	$11.83
Annual Revenue	$3.8	$14.2	$38.5	$83.2	$142.0
Gross Margin	78%	82%	84%	85%	86%
Gross Profit	$3.0	$11.6	$32.3	$70.7	$122.1
S&M Expense	$3.2	$6.8	$10.8	$15.7	$21.3
R&D Expense	$2.3	$4.2	$7.2	$10.8	$14.2
G&A Expense	$0.7	$1.4	$2.1	$3.3	$4.3
EBITDA	($1.8)	$2.8	$13.9	$39.0	$86.6
EBITDA Margin	—	20%	36%	47%	61%
Net Income	($4.2)	($0.6)	$8.1	$29.1	$69.5

Key Growth Assumptions

- Customer acquisition cost (CAC) of $420 declining to $280 via organic channel growth and community referrals
- LTV:CAC ratio improving from 8.2x to 14.5x as platform stickiness increases with each new module adopted
- Net revenue retention of 142% driven by tier upgrades and cross-sell of AI agent services, lending tools, and marketplace access
- Payback period of 2.8 months reflecting the platform's immediate value delivery upon onboarding

SECTION 09

Unit Economics & Margin Analysis

1325.AI's unit economics are exceptional by SaaS standards, driven by the platform's AI-native architecture that reduces marginal cost of service delivery as the subscriber base scales. The four-tier model ($19 Essentials, $49 Starter, $149 Pro, $599 Enterprise) maximizes market penetration while preserving premium ARPU.

$19–$599	$8,340	$420 → $280	14.5x
MONTHLY TIERS	CUSTOMER LTV	CAC	LTV:CAC
4-tier subscription	36-month avg tenure	Declining w/ scale	At maturity

Margin Progression

Metric	Year 1	Year 2	Year 3	Year 4	Year 5
Gross Margin	78%	82%	84%	85%	86%
Operating Margin	—	12%	28%	42%	57%
EBITDA Margin	—	20%	36%	47%	61%
Net Margin	—	—	21%	35%	49%
FCF Margin	—	—	15%	28%	44%

Cost Structure Advantage — AI-Native Architecture

Unlike traditional SaaS platforms that require proportional headcount increases to serve more customers, 1325.AI's 23 autonomous AI agents handle the majority of operational workload. This creates a fundamentally different cost curve:

- Customer support: Kayla AI Concierge handles 85%+ of inquiries autonomously, reducing support staff needs by 70%
- Onboarding: AI-driven setup wizards and automated data import reduce onboarding cost from ~$150 to ~$12 per customer
- Infrastructure: Serverless architecture on Supabase Edge Functions scales elastically with zero idle costs
- Content & compliance: Automated regulatory monitoring and document generation eliminate manual compliance overhead

SECTION 10

Competitive Moat & Defensibility

1325.AI occupies a unique position at the intersection of four categories that no existing competitor addresses simultaneously. This 'Four-Way Intersection' creates compounding defensibility that strengthens with each new user, data point, and transaction processed through the platform.

Competitive Matrix — Feature Comparison

Feature	Zoho	SFDC	HubS	Gusto	Align	1325
Autonomous Agentic AI	Ent.	—	—	—	—	✓
Built for Black-Owned Biz	—	—	—	—	—	✓
Records Mgmt + OCR Vault	—	—	—	—	—	✓
Credit & Lending Readiness	—	—	—	—	—	✓
Supplier Diversity + Gov	—	—	—	—	—	✓
Community Impact Score	—	—	—	—	—	✓
Grant & Funding Matcher	—	—	—	—	—	✓
Directory Auto-Discovery	—	—	—	—	—	Partial
Voice AI (WebRTC)	Ent.	—	—	—	—	✓
Self-Healing Infra	—	—	—	—	—	✓
Patent Protected (27)	—	—	—	—	—	✓
6-Country Diaspora	—	—	—	—	—	✓

Moat Classification

- **Network Effects:** CMAL engine creates value loops — more businesses = more matches = more transactions = more data = better AI
- **Switching Costs:** 294+ table deep integration makes migration economically irrational after 90 days of use
- **IP Protection:** 27-claim patent creates legal barriers for 20 years across all core capabilities
- **Data Moat:** 17,000 businesses discovered daily enriches the directory — competitors start from zero

SECTION 11

CMAL Engine — Growth Flywheel

The Community Money Acceleration Loop (CMAL) is 1325.AI's proprietary growth engine that creates self-reinforcing economic cycles within the platform ecosystem. Unlike traditional SaaS growth models that rely on linear sales motions, CMAL generates compounding network effects.

CMAL Cycle Mechanics

Phase	Mechanism	Outcome
1. Discovery	17K businesses/day auto-discovered via AI web scraping	Directory grows
2. Onboarding	AI-guided setup, OCR document vault, instant profile	Data deepens
3. Matching	Autonomous B2B matching based on needs & capabilities	Transactions begin
4. Transaction	Invoicing, payments, credit scoring within platform	Revenue generated
5. Scoring	Community Impact Scorecard tracks economic contribution	Trust builds
6. Referral	High-score businesses attract new members organically	Network expands
7. Acceleration	More data improves AI accuracy, more matches, more value	Cycle compounds

CMAL Impact Metrics

1.4x	3.2x	14 days
VIRAL COEFFICIENT	NETWORK MULTIPLIER	CYCLE TIME

Each user brings 1.4 new users. Value per user increases 3.2x. Full CMAL loop completion in 14 days. The CMAL engine's compounding nature means that customer acquisition costs decrease over time while lifetime value increases — the hallmark of a platform with genuine network effects. At 50,000+ active businesses, the platform reaches critical mass where organic growth exceeds paid acquisition, fundamentally changing the unit economics and supporting premium valuation multiples.

SECTION 12

Revenue Diversification & Expansion

1325.AI's integrated platform architecture enables multiple revenue streams that reduce concentration risk while increasing per-customer revenue over time. The tiered subscription model ($19–$599/mo) is the entry point for a much larger economic relationship.

Revenue Stream Breakdown (at Scale)

Revenue Stream	Pricing Model	Mix %	Year 5 Rev
Core SaaS Subscriptions	$19–$599/mo tiered	40%	$56.8M
B2B Marketplace Fees	2.5% transaction fee	18%	$25.6M
AI Agent Premium Actions	Per-action pricing	14%	$19.9M
Lending & Credit Services	Origination + referral	10%	$14.2M
Grant Matching Fees	Success-based fee	5%	$7.1M
API & Developer Platform	Usage-based pricing	5%	$7.1M
Directory Advertising	Promoted listings	4%	$5.7M
Data & Analytics	Insights subscriptions	4%	$5.7M
Total		100%	$142.0M

Expansion Revenue Mechanics

- **Land:** Essentials tier at $19/mo lowers barrier to entry — 30-day free trial builds trust before commitment
- **Expand:** Tier upgrades ($49 → $149 → $599), marketplace transactions, and premium AI actions drive 142% NRR
- **Retain:** Deep integration (294+ tables) and community network effects create exceptional switching costs
- **Compound:** Each business brings suppliers, customers, and partners onto the platform organically

This diversified revenue model reduces dependency on any single stream and supports a premium valuation multiple. The platform's ability to capture value at every stage of the business lifecycle — from discovery to transactions to lending — mirrors the 'super app' model that has driven trillion-dollar valuations in Asian markets.

SECTION 13

Growth Milestones & Capital Efficiency

1325.AI's growth trajectory follows a capital-efficient path enabled by AI-native architecture. Each funding milestone is designed to unlock specific capabilities and market expansion phases while maintaining strong unit economics.

Funding & Valuation Trajectory

Round	Timeline	Raise	Valuation	Milestone
Pre-Seed	Current	$150K	$24–30M	MVP + Patent Filed
Seed	Q3 2026	$2–3M	$35–50M	US Market Launch
Series A	Q1 2027	$8–12M	$80–150M	3-Country Expansion
Series B	Q4 2028	$25–40M	$300–600M	6-Country + Fintech
Series C	Q2 2030	$60–100M	$800M–1.5B	Full Platform Scale
Pre-IPO / Exit	2031+	—	$3–5B+	Category Leader

Capital Efficiency Benchmarks

Metric	Year 1	Year 3	Year 5	Commentary
Revenue per $ Raised	$1.02	$4.47	$11.48	Compounding returns
Burn Multiple	3.2x	1.4x	0.6x	Cash-flow positive by Yr 3
Months to Payback CAC	4.2	3.1	2.1	Improving efficiency
Magic Number	0.8	1.2	1.6	Sales efficiency > 1.0

The AI-native architecture provides a structural advantage in capital efficiency. While traditional SaaS companies require $1.50–$2.00 of spend for every $1.00 of new ARR, 1325.AI's autonomous agents reduce this to $0.60–$0.80 at scale, representing a 2–3x improvement in capital efficiency over industry benchmarks.

SECTION 14

Risk Factors & Mitigation

A comprehensive valuation must account for risks that could impact projected outcomes. The following analysis identifies key risk categories and the platform's built-in mitigation strategies.

Risk Factor	Level	Mitigation Strategy
Market Adoption Speed	Medium	17K/day auto-discovery + ambassador network of 500+ agents
Technology Execution	Low-Med	Self-healing infrastructure + serverless architecture
Competitive Response	Low	Patent protection + 18-month head start + deep community trust
Regulatory Changes	Low	Automated compliance monitoring + jurisdiction-specific frameworks
Funding Environment	Medium	Capital-efficient model reaches profitability with seed funding
Key Person Risk	Medium	Patent assigned to company + documented architecture + team building

Risk-Adjusted Valuation Impact

Applying a composite risk discount of 15–25% to the base case valuation yields a risk-adjusted range of $1.37B–$1.55B. This remains well above the billion-dollar threshold that supports the valuation thesis, even under conservative risk assumptions.

SECTION 15

Valuation Synthesis & Conclusion

Synthesizing all five valuation methodologies produces a comprehensive enterprise value range with strong convergence across independent approaches, reinforcing the reliability of the billion-dollar-plus valuation thesis.

Methodology Convergence Analysis

Methodology	Bear Case	Base Case	Bull Case
Revenue Multiples (12–20x)	$924M	$1.56B	$2.84B
Discounted Cash Flow (10yr)	$1.12B	$2.04B	$2.68B
Comparable Transactions	$578M	$1.66B	$2.84B
IP Portfolio Valuation	$135M	$337M	$540M
Sum-of-Parts + Synergies	$1.39B	$2.14B	$3.06B
Weighted Average	$910M	$1.82B	$2.84B

$910M	$1.82B	$2.84B
BEAR CASE	BASE CASE ENTERPRISE VALUE	BULL CASE
25th percentile	Weighted median	75th percentile

Conclusion

Five independent valuation methodologies converge on a **base-case enterprise value of $1.82 billion**. This valuation is supported by: (1) a patent-protected technology moat with 27 claims, (2) a $127B total addressable market across six countries, (3) unit economics that exceed SaaS industry benchmarks with 142% NRR, (4) a proprietary CMAL growth engine that creates compounding network effects, and (5) a fundamentally differentiated platform operating at an intersection no competitor currently occupies.

SECTION 16

Strategic Exit Scenarios

Multiple exit pathways exist for 1325.AI, each with distinct valuation implications. The platform's multi-vertical architecture makes it attractive to a wide range of strategic acquirers and positions it well for an independent public offering.

Potential Strategic Acquirers

Acquirer	Strategic Rationale	Est. Range	Multiple
Salesforce	Community Cloud expansion + AI agent capabilities	$2–4B	30–40x Rev
Intuit (Mailchimp)	SMB ecosystem + underserved market expansion	$1.5–3B	20–30x Rev
Shopify	B2B marketplace + diaspora commerce network	$1.5–2.5B	15–25x Rev
Block (Square)	Fintech infrastructure + community banking	$2–3.5B	25–35x Rev
Microsoft	LinkedIn economic graph + Dynamics 365 vertical	$3–5B	30–50x Rev

IPO Scenario Analysis

- **Target timeline:** 2031–2032, following achievement of $142M+ ARR and consistent profitability
- **Comparable IPO valuations:** Recent vertical SaaS IPOs have priced at 15–25x forward revenue
- **Public market positioning:** 'The Economic Operating System for the African Diaspora' — a compelling narrative for ESG-focused institutional investors
- **Projected IPO valuation:** $3B–$5B at 20–30x forward revenue of $200–$250M ARR

The strength of multiple exit pathways provides investors with downside protection: even if the IPO window is unfavorable, strategic acquirers across fintech, SaaS, and marketplace verticals would find compelling value in the platform's unique assets.

SECTION 17

Legal Disclaimer & Disclosures

Forward-Looking Statements

This valuation report contains forward-looking statements based on current expectations, estimates, and projections about the industry, management's beliefs, and certain assumptions made by 1325.AI. These statements are not guarantees of future performance and involve risks, uncertainties, and assumptions that are difficult to predict. Actual results may differ materially from those expressed or implied.

Valuation Methodology Limitations

The valuations presented herein are based on methodologies commonly used in the venture capital and investment banking industries. However, early-stage company valuations are inherently uncertain and subject to significant variability. The comparable companies and transactions used as benchmarks may not be perfectly analogous to 1325.AI's business model, market position, or growth trajectory.

Confidentiality

This document is confidential and intended solely for the use of authorized recipients. It may not be reproduced, distributed, or disclosed to any third party without the prior written consent of 1325.AI. The information contained herein is proprietary and constitutes trade secrets of the company.

Intellectual Property Notice

1325.AI, the CMAL Engine, Kayla AI Concierge, and all associated trademarks, patents (USPTO Provisional 63/969,202), and trade secrets are the exclusive property of 1325.AI. All rights reserved. Patent pending — 27 claims filed covering autonomous business operations through agentic AI.

No Offer of Securities

This report does not constitute an offer to sell or a solicitation of an offer to buy any securities. Any such offer would only be made pursuant to a definitive offering memorandum or other appropriate documentation in compliance with applicable securities laws.
