1325.AI x NMSDC

Empowering NMSDC-Certified MBEs with AI-Powered Economic Infrastructure

A partnership proposal for the National Minority Supplier Development Council

Prepared for leadership review | April 2026

Economic operating system for community wealth

ORIGIN STORY

Why 1325?

The name connects historic wealth circulation to modern economic infrastructure.

In 1325 CE, Mansa Musa — Emperor of the Mali Empire — began a pilgrimage that changed economies across continents. By distributing so much gold along the route, he demonstrated how concentrated wealth can reshape entire systems.

His legacy was not personal excess. It was infrastructure: universities, mosques, trade routes, and institutions that multiplied economic power for generations.

1325.AI applies that same thesis today: when wealth is circulated intentionally, communities do not just spend — they build durable economic capacity.

The Name Is the Mission

1325 represents the moment one person showed what intentional economic power can do. AI represents the modern operating layer needed to rebuild that capability digitally, systemically, and at scale.

$400B+

Mansa Musa equivalent wealth

Modern estimate of his economic influence.

6 hrs vs 28+ days

Black dollar circulation gap

1325.AI exists to close this structural lag.

THE OPPORTUNITY

NMSDC has the network. 1325.AI brings the operating system.

Verified MBEs are ready for infrastructure that expands visibility, retention, automation, and supply-chain access.

15,000+

Certified MBEs

Verified, contract-ready businesses across the network.

$400B+

Annual minority revenue

Economic base already moving through member businesses.

1,500+

Corporate members

Buyers seeking diverse suppliers and measurable outcomes.

23

Regional councils

A national distribution and activation engine.

NMSDC-certified MBEs represent the gold standard in verified minority business capacity. Many still lack the AI tools, loyalty systems, payments infrastructure, and data visibility that larger competitors treat as baseline. 1325.AI closes that gap with a purpose-built, measurable platform for community economic circulation.

PLATFORM OVERVIEW

Who is 1325.AI?

A full-stack economic operating system built for minority business growth and measurable circulation.

AI-Powered Marketplace

Connects consumers to minority-owned businesses through intelligent discovery, search, and recommendations.

QR Loyalty Engine

Drives repeat spending and tracks economic circulation through a closed-loop rewards layer.

Agentic AI Workforce

Kayla automates outreach, scheduling, CRM, analytics, and daily business operations.

Patent-Protected IP

USPTO Provisional 63/969,202 with 27 claims across fraud detection, B2B matching, and voice AI.

Enterprise-Grade Depth

294+ database tables, 110+ Edge Functions, and 28 AI modules engineered to scale.

Mission-First Design

Built specifically for community wealth creation — not retrofitted from generic SaaS tooling.

MEMBER VALUE

How 1325.AI strengthens member businesses

Every feature is mapped to visibility, retention, operational efficiency, or capital readiness.

Visibility & Discovery

AI-curated profiles, search, location filters, and recommendations that increase traffic and engagement.

Customer Retention

Points, QR offers, and repeat-visit rewards that keep more spending inside member ecosystems.

AI Business Intelligence

Revenue dashboards, customer insights, and recommendations that turn activity into action.

Digital Payments & POS

Integrated checkout, invoicing, and transaction tracking from one operating layer.

B2B Supply Chain Matching

Corporate and member-to-member matching that keeps procurement dollars in-network.

Grant & Capital Readiness

Visibility into growth milestones, documents, and financial performance for funding conversations.

ONBOARDING

A clear activation path from certification to live infrastructure

The member journey is designed for speed, confidence, and measurable first value.

1 Sign up via NMSDC portal

Members enter through a co-branded landing page and certification status is verified automatically.

2 Build the digital storefront

AI-assisted setup captures profile details, offers, service categories, images, and hours in minutes.

3 Activate loyalty & payments

Members launch QR rewards, connect payments, and begin tracking circulation immediately.

4 Grow with AI insights

Kayla surfaces recommendations, automates campaigns, and identifies B2B opportunities inside the network.

AI CONCIERGE

Kayla turns back-office labor into automated capacity

A practical AI workforce layer for member growth, service, and retention.

28

AI modules

Purpose-built agents across outreach, CRM, content, and analytics.

24/7

Always available

Persistent operating support without staffing gaps.

110+

Edge Functions

Workflow and data automation across the platform.

$3K–$5K

Monthly labor value

Estimated manual work replaced per business.

Automated Marketing

Campaigns, social posts, and follow-up sequences tailored to each business.

Smart Scheduling

Bookings, reminders, and customer follow-ups handled automatically.

Financial Insights

Revenue forecasts, trends, and growth signals for better decisions.

Customer Intelligence

Behavioral patterns, churn signals, and retention opportunities surfaced in real time.

COMPETITIVE ANALYSIS

No competitor replicates the full 1325.AI stack

Independent scan of major platforms across mission fit, infrastructure depth, and defensibility.

Capabilities: Directory | Loyalty | AI Ops | Payments | B2B | Fraud | Patent/IP | Proprietary Data

Platform	Dir	Loy	AI	Pay	B2B	Fraud	Patent	Data	Score
1325.AI	**Yes**	**Yes**	**Yes**	**Yes**	**Yes**	**Yes**	**Yes**	**Yes**	**8/8**
Amazon	No	No	No	Yes	No	Yes	No	Yes	**3/8**
Alibaba	No	No	No	Yes	Yes	No	No	Yes	**3/8**
Salesforce	No	No	Yes	No	No	No	No	Yes	**2/8**
Yelp	Yes	No	No	No	No	No	No	No	**1/8**
WeBuyBlack	Yes	No	No	No	No	No	No	No	**1/8**
Official Black Wall Street	Yes	No	No	No	No	No	No	No	**1/8**

No competing platform clears 3/8 across the full capability set. 1325.AI is the only integrated 8/8 model in this landscape.

COMPETITIVE MOATS

The advantages are structural — not cosmetic

The moat is built from intellectual property, data, trust, and technical execution depth.

27 claims of patent coverage

USPTO Provisional 63/969,202 spans geospatial fraud detection, B2B matching, and voice-enabled AI workflows.

CMAL network effect

The Community-Mapped Asset Ledger becomes more valuable with each transaction, reward event, and match.

Community trust

Cultural alignment and member credibility cannot be cloned by generic enterprise tooling.

294+ tables of technical depth

The system already includes workflow orchestration, analytics, and modular service layers that would take years to replicate.

MARKET SIZE

The demand side and the infrastructure market are both large

1325.AI sits at the intersection of consumer spending, B2B procurement, AI automation, and loyalty economics.

$1.6T

African diaspora consumer TAM

Addressable consumer spending across the diaspora.

$7.9T

B2B marketplace opportunity

Global procurement and supplier-matching potential.

$126B

AI workforce market

Projected automation value by 2030.

$24B

Loyalty & rewards market

Global market for retention infrastructure.

PARTNERSHIP

What each side gains from the collaboration

The structure creates stronger member value, clearer impact measurement, and faster distribution for both organizations.

What NMSDC gets

- Enhanced member value through AI-powered business tools
- Measurable economic impact data across the network
- A co-branded innovation platform for member engagement
- Potential revenue share on premium subscriptions
- A stronger corporate member proposition
- A digital transformation narrative for stakeholders

What 1325.AI gets

- Access to 15,000+ pre-verified MBE businesses
- NMSDC certification trust and brand credibility
- Distribution through 23 regional councils
- Corporate member access for B2B partnerships
- Joint visibility at events and campaigns
- Live operational feedback for optimization

PROJECTED IMPACT

What success can look like in the first 12 months

The partnership is designed to create visible traction across adoption, spending, retention, and B2B activity.

3,000+

MBEs onboarded

Modeled partnership outcome.

$12M+

Tracked spending

Modeled partnership outcome.

150K+

Consumer connections

Modeled partnership outcome.

85%

Retention rate

Modeled partnership outcome.

500+

B2B matches

Modeled partnership outcome.

23

Regional launches

Modeled partnership outcome.

IMPLEMENTATION

12-month rollout plan

A phased structure keeps the launch manageable while building toward full national coverage.

Phase 1 | Months 1–3

Pilot

- 3 regional councils
- 500 MBEs onboarded
- Co-branded landing page
- Training and support live

Phase 2 | Months 4–6

Expand

- 10 councils active
- 1,500 MBEs onboarded
- Conference integration
- B2B matching live

Phase 3 | Months 7–9

Scale

- 23 councils active
- 2,500+ MBEs live
- Impact dashboard
- Corporate member API

Phase 4 | Months 10–12

Institutionalize

- Annual report
- Certification API
- Advanced AI features
- National success story

BARRIER TO ENTRY

Replication is expensive, slow, and strategically difficult

A credible competitor would need to build technology, clear IP, and earn trust at the same time.

- Build an AI-powered directory focused on a specific cultural community
- Develop autonomous AI agents for small business operations
- Create a B2B matching engine with patent-clear technical pathways
- Design an economic circulation tracking protocol comparable to CMAL
- Implement geospatial fraud detection and verification systems
- Earn the community trust required for meaningful adoption

Estimated cost to rebuild

$15–20M

+ 3–4 years of execution

That assumes the patent landscape, data model, and community trust hurdles can all be cleared.

Next Steps

Let’s build the modern economic infrastructure MBEs deserve.

1. Align on partnership structure

Confirm goals, governance, and the operating model for the collaboration.

2. Select pilot councils

Identify three launch markets and define the first member cohort.

3. Launch the story publicly

Co-develop a press release, conference narrative, and success metrics.

When NMSDC’s trusted certification meets 1325.AI’s operating system, every certified MBE gains better tools to compete, grow, and build generational wealth.
